Docker Compose

Goals

- · Run a Docker Compose system
- · Examine a functioning Docker Compose system

■ Tasks

Take a look at the Docker Compose examples in the <u>Awesome Compose repo</u>. Pick one of them that interests you, get it running on your local machine, and then answer the following questions.

Deliverables

- 1. Which example did you pick and why?
- 2. Were you able to run it successfully?
- 3. What's one thing you learned about Docker Compose from running an example that you weren't able to glean from the lecture today?
- 4. What is one service option that you learned about and what does it do?
- 5. Describe the directory structure of the example you chose.
- 6. How could you use this example to help with your final project?
